Cross-Functional Communication | Relationship Building | UI/UX Design | Front End Development | Front-End Web Development
Version Control | Web Administration | Testing / Debugging / Browser Development Tools | Responsive Design
Technical Snapshot: HTML | CSS | Sass | JavaScript | Bootstrap | Git | Vite | Figma | Photoshop

SIGNATURE CONTRIBUTIONS

- Drove the creation of a dynamic online platform for a new restaurant launch during the COVID-19 pandemic, leading to increased customer engagement and attraction during the establishment's renovation phase. Developed and executed a user-friendly website to enhance customer interaction. Directed a highly effective social media campaign resulting in a rapid 2000-follower increase within the first 30 days prior to the restaurant's grand opening.
- Revamped an outdated website for a local real estate group by completely redesigning and developing a new, fully responsive site. Prioritized accessibility and utilized semantic HTML, CSS, and JavaScript to deliver a modern and user-friendly platform.
- Experienced in successfully implementing and managing online ordering systems for restaurants. Collaborated with POS provider to design and develop a customized online ordering system, resulting in a fully responsive website accessible across all devices. Instrumental in boosting restaurant sales by generating 40% of total orders through the online platform.

CAREER HIGHLIGHTS
